

ACM

ACM-M-A-V2 ANALOG TELEPHONE SYSTEM

FEATURES

- **PABX made for the Marine environment**
- **Extensive and programmable features supporting all key PABX functions**
- **Supports remote management and maintenance using IP and Web technologies**
- **Support public address (PA) calls via interface to PA systems**
- **Supports IP DECT and wireless handset**
- **External communication (GSM and analogue) and billing**
- **Redundant power input with auto-switchover between AC to DC power**
- **Support the VINGTOR-STENTOFON billing system**

DESCRIPTION

The ACM-M-A-V2 is a PABX made for Marine environment. The exchange is based on the well known VINGTOR-STENTOFON ACM solution. Featuring the latest developments such as high capacity line cards, remote management and maintenance using IP and Web technologies as well as VoIP gateways. An optional VoIP gateways provides a flexible interface to analogue and digital telephone trunks with 2, 4 and 8 channels.

The exchange is available in different sizes, from 24 to 60 subscribers. It is housed in a wall mounted cabinet which is optimized for easy installation and maintenance. All connections are easily accessible from the front. The exchange can be powered from an AC and/or DC power supply and features automatic switch-over.

The PABX has an interface for connection to a Public Address system. Access to the Public Address interface is programmable.

TYPE APPROVED:

THE SYSTEM IS TESTED ACCORDING TO EN 60945, AND IS TYPE APPROVED BY DNV-GL, CCS, RMRS, PRS, CRS, AND LR
